Superior Furniture
by Hill Finishing

Superior Furniture ... Our History

Ervin Yoder grew up on a farm and learned the value of hard work and personal responsibility as he worked alongside his dad. At the age of 17 he got a job at a local wood working shop and learned how to build and finish fine furniture.

In 1999 he established Hill Finishing, a custom finish shop. They started out with a few accounts, one part-time employee, a lot of hard work and dedication. As the company grew more employees were added. With a team to help him and vision for the future, the focus shifted from finishing furniture to customer service.

By 2005 Hill Finishing had outgrown their space. Land was purchased and a new facility was built in the rolling hills of Ohio's beautiful countryside. With a desire to be more than a finish shop, they began designing and building furniture and a marketing strategy to sell it. This was the beginning of Superior Furniture.

In 2020 they expanded their facility to 18,000 square feet so that both finishing and manufacturing operations would be in one location. Currently they have 20 employees and one sub contractor who builds some of our pieces.

Superior Furniture's mission is to create an environment for their employees that exemplifies Christian ethics and values. They strive to treat each person on their team with dignity and respect.

The goal for their customers is to deliver outstanding products and services. They offer a broad product line which includes Dining Room, Bedroom, Home Office, Bookcases and Occasionals.

Ervin is quick to give credit where credit is due. "Without the diligence and hard work of our employees, who are committed to excellent quality and outstanding customer service, Superior Furniture would not be where it is today. We give all honor and glory to God, our Creator, who gives the increase."

Hardwood Selection

Red Oak

A traditional choice in hardwoods with an open, wide grain that is strong and durable and withstands daily wear.

Quartersawn White Oak

Boasts an amazing straight grain pattern that is acquired by cutting it perpendicular to it's growth rings. A timeless choice.

Rustic Quarter Oak

Same perpendicular cut to the growth rings but not sorted for imperfections so the natural characteristics such as knots show through showcasing the natural beauty of the wood.

Walnut

A premium domestic hardwood prized for it's strength, resilience, grain and color.

Brown Maple

A versatile, popular wood choice, it features a tight, fine grain which gives it a smoother appearance. It is great for staining, painting or distressing and has an economical price tag.

Hard Maple

This wood has a fine, even texture with a generally straight grain. It's beauty and strength make it a great choice for furniture.

Tiger Maple

An exotic and unusual wood recognized by it's beautiful grain and unique striping. Highly durable and resists denting.

Hickory

Known to be the hardest, heaviest and strongest American wood. It's grain is coarse and tight and has a unique variation of light and dark colors.

White Oak

A traditional tight grained wood—strong, durable and withstands daily wear. It has long been prized for it's durability by whiskey makers, and has recently become the hottest craze in the furniture industry.

Cherry

Prized for it's rich color, smooth grain, flexibility and aging process. Considered one of the finest hardwoods.

Rustic Cherry

Simply a more natural, less refined version of Cherry wood. Imperfections like knots, grain variations and mineral streaks add to the rugged, natural look.

Elm

Features a distinct "feathery" grain with lots of color variation. Pairs well with Brown Maple for two-tone designs.

Finish Colors

OHIO CERTIFIED STAINS

RED OAK

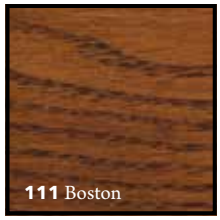

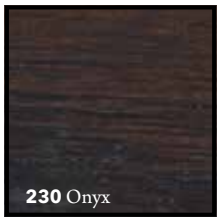

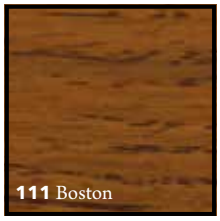

- Samples are displayed to show approximate colors.
- To ensure accuracy we recommend using wood samples to select your stain.
- Many more finishes are available, including distressed, glazed, or crackle.

Janka Wood Rating System

The Janka hardness scale measures the force that's required to embed a steel ball halfway through a sample of wood. The ball is 0.444 inches in diameter and fired with increasing force. The pounds of force needed to push the ball to the center is the Janka value you end up with.

This number is incredibly useful in directly determining how well a wood will withstand dents, dings, and wear—as well as indirectly predicting the difficulty in nailing, screwing, sanding, or sawing a given wood species.

Care & Maintenance

Conversion Varnish is the most commonly used finish in the high-end furniture market. When properly applied and cared for, the beauty of your furniture's finish will be enjoyed for many generations. Conversion Varnish has excellent resistance to foods, beverages and common household chemicals. However, to maintain the beautiful appearance of your furniture, a few care guidelines must be followed:

- Excessive waxing can cause moisture from a beverage can or glass to leave a milky white ring on the surface.
- Do not use cleaners containing bleach.
- Avoid cleaners with abrasives, they may scratch the finish.

- Do not allow cleaners containing ammonia to come in contact with your furniture's finish. Ammonia may turn oak black and painted pieces yellow.

- Dyes and inks may discolor the finish. The ink and dyes from newsprint and plastic bags may penetrate into the finish when moist.
- Conversion Varnish offers a very hard mar resistant surface, but like any finish, it may still be scratched or damaged if not cared for properly.

It should be noted that our new Conversion Finish does not achieve its maximum performance properties for at least 30 days from the time it was finished. This is based on maintaining a temperature of at least 70°.

CLEANING GUIDELINES

Generally a soft damp cloth followed by a dry cloth will be all you need to clean the finish. If a cleaner is required, use only a very mild soap and wipe dry. A high quality furniture polish may be used occasionally. Apply polish with a soft cloth following manufacturer's instructions.

CLEANING:

Fingerprints, cooking residues, tobacco smoke, etc. will accumulate on any finished surface. They will not damage the finish, but should be removed occasionally to restore the finish to its original state. Wipe the finish with a damp cloth using a non-wax polish or mild soap.

SPILLS:

Your finish is resistant to most household spills. If a spill should occur, it should be wiped up immediately to avoid any potential damage.

EXCESSIVE EXPOSURE:

Heat, high humidity, direct sunlight or liquids can damage both the finish and the wood. Take care to avoid these conditions.
